AIM:

Create an application for student result management using React JS.

CODE:

App.js

```
import React, { useState } from 'react';

import StudentForm from './components/StudentForm';
import StudentList from './components/StudentList';
import './App.css';

const App = () => {

  const [students, setStudents] = useState([]);

  const addStudent = (student) => {

    setStudents([...students, student]);};

  const calculateAverage = () => {

    if (students.length === 0) return 0;

    const total = students.reduce((sum, student) => sum + student.marks, 0);

    return (total / students.length).toFixed(2);

  };

import React, { useState } from 'react';
import './StudentForm.css';

const StudentForm = ({ addStudent }) => {

  const [name, setName] = useState("");

  const [marks, setMarks] = useState("");

  const [error, setError] = useState("");
```

```

const handleSubmit = (e) => {
  e.preventDefault();

  if (!name) {
    setError('Please enter a student name.');
```

```
    return;}

  if (!marks || marks < 0 || marks > 100) {
    setError('Please enter valid marks (0-100).');
```

```
    return;}

  setError("");
  addStudent({ name, marks: parseInt(marks) });
  setName("");
  setMarks("");

};

return (
  <form onSubmit={handleSubmit} className="student-form">
    <div className="form-group">
      <label>Student Name:</label>
      <input
        type="text"
        placeholder="Enter student name"
        value={name}
        onChange={(e) => setName(e.target.value)}
      />
    </div className="form-group">

```
